

PIONEERING INNOVATIVE  
SOLUTIONS FOR

# THE GLOBAL CASH EXCHANGE MARKET

## OUR COMPANY

4xLabs is a fintech company that provides SaaS solutions to address the challenges of both money service businesses and travellers dealing in the physical FX market. Founded in 2011, we are headquartered in Singapore, with a regional office in Vietnam, and a network of sales representatives globally. In 2012, we created a platform for travellers to easily search for the best cash exchange rates from money service businesses known as Get4x.

In 2015, we launched Biz4x, a SaaS solution that was created through close consultation with the money service operators, to be an all-in-one solution for them to accelerate their business growth, and adhere to stricter compliance regulations from regulatory authorities.

With a year of launch, we had 40% of the money service businesses in Singapore on our platform, which gave credence to our belief that we are providing a unique solution for them that addresses a real market gap.

Today, Biz4x is used by hundreds of money service businesses in more than 10 different countries. We built our solution with the future in mind to empower money service businesses with the technology to gain more insights, safeguard their assets and increase their profits.

# OUR PRODUCTS

**FOR MONEY SERVICE BUSINESSES**

Money service businesses that are looking for a more efficient operating system now have Biz4x - an integrated suite of services that provides them with live FX rates, facilitates Know Your Customer background checks through access to a compliance database (Anti-Money Laundering, Countering the Financing of Terrorism, sanctions and Politically Exposed Persons), and streamlines processes by tracking stock, price of currencies and customer transactions. With Biz4x, money service operators can leverage the global network of 4xLabs to acquire new customers every day.

Biz4x helps money service operators to access all the business-critical features they need in one convenient and user-friendly dashboard at a cost effective price. Through the power of cloud computing, money service businesses receive bi-weekly updates to their platform with a single annual subscription, thus ensuring that the Biz4x platform is always equipped with the latest features to navigate the constantly evolving challenges of running a currency exchange business.

**FOR GLOBAL TRAVELLERS**

Get4x is an online aggregator of cash exchange rates that are provided by money service operators who are connected to this platform through Biz4x. Once money service operators have set their Buy and Sell rates online through Biz4x, travellers can quickly and easily discover the most convenient location for them to conduct a currency exchange transaction on Get4x. In addition to being a rates aggregator, Get4x serves as an online directory of currency exchange outlets that is constantly growing. Through Get4x, money service businesses can distinguish themselves from the competition by highlighting their unique service offerings.

For travellers, the inconvenient experience of physically checking out the rate boards at money exchange outlets has been replaced by the Get4x app that provides ease of access and information about money service businesses and exchange rates wherever they may be. Get4x is now available in 13 cities around the world such as Bali, Jakarta, Bangkok, Pattaya, Phuket, Dubai, Hong Kong, Macau, Kuala Lumpur, Johor Bahru, Mumbai, Singapore, Sydney, and the service will continue to expand to all major travel hubs globally.
